

Case Study

Simplifying Retail Sales with a Mobile POS Application Seamlessly Integrated with SAP ERP

About Client

Client : A leading retail giant operating supermarkets worldwide.

Industry : Retail & Consumer Goods.

Products/Services : Supermarkets, hypermarkets, and retail distribution.

Geography : Headquartered in the UAE with a global presence.

Customers : Shoppers, households, and businesses.

The Challenge

The client needed a mobile POS application that could:

- Enable on-the-go sales transactions using mobile devices
- Simplify the sales process with an intuitive interface for store staff
- Post invoices and receipts directly into SAP ERP in real time
- Reduce dependency on legacy machines and manual reconciliation
- Provide a scalable, future-ready solution for multiple store locations

CCS Solution

CCS Technologies built a Mobile POS Sales Application as a side-by-side extension to SAP ERP. Designed with scalability and flexibility in mind, the solution integrates seamlessly with SAP through standard APIs.

Key Features included:

- Mobile-first design for fast, flexible transactions
- Real-time posting of invoices, receipts, and stock updates into SAP ERP
- Easy-to-use interface requiring minimal staff training
- Secure authentication with role-based access controls

- Multiple payment options (cash, cards, digital wallets)
- Built with minimal disruption to SAP's core processes

Business Benefits

The solution delivered measurable results for the client:

- **Real-time integration:** Instant visibility of sales data in SAP ERP
- **Better customer experience:** Faster and more flexible transactions
- **Error reduction:** Fewer reconciliation delays and manual mistakes
- **Higher staff productivity:** Intuitive, user-friendly interface
- **Scalable architecture:** Multi-location retail support without heavy IT investments
- **Future-ready design:** Supporting the client's ongoing digital transformation journey
